Index of Key words

Abscisic acid 243
Acer 71
Acylation 159
Aldolase 265, 271
Aleurone 185
Amaranthus 133
Amino acids 107
Amino compounds 13
Ankistrodesmus 231
Anthephora 243
Anthocyanin biosynthesis 159
Armoracia 215
ATPase 203
Auxin 65, 293
Auxin habituation 247
Avena 49
Bryophyllum 165
BUdR-Tolerance 247
Calcium ions 225, 293
Capparis 215
Capsicum 107
Carbohydrate metabolism 71
Cell *Convolvulus* 235
Cell culture 71, 85, 91, 287
Cell cycle 29
Cell growth 293
Chlorella 139
Chlorophyll content 65
Chloroplast 53, 65, 97, 139, 279, 303
Chloroplast envelope 309
Chlorplast membranes 195
Chromatin 153
CO_2-fixation 303
Coleus 287
Cotyledons 37, 119
Crown-gall 165, 247
3′:5′-Cyclic-AMP phosphodiesterase 165
Cytokinin 91, 243
Cytokinin habituation 247
Daucus 85
Desmids 207
Diaphorase 231
Diffusion techniques 169
Dithiothreitol activation 89
Embryo culture 113
Endoplasmic reticulum 215
Endosperm 185
Enzyme development 37
Enzyme inactivation 231
Enzyme induction 77
Enzyme localization 49
Epidermis 49
Euphorbia 215
Ferredoxin 279
Ferredoxin-coding-site 97
Festuca 53
Flavonoid metabolism 49
Flowering 133
Forsythia 177
Free space 235
Frost-hardening 195
Funaria 91
Fusion 253
Genetic block 159
Germination 169
Germination (embryo) 113
Germination (pollen) 299
Gibberellin 25, 169, 293
Glucosinolates 215
Glycolysis 259
Glycosidases 235
Glycosylation 159
Gossypium 113
Greening 77
Habituation *Nicotiana* 247
Haplopappus 29
Heterostyly 177
Hordeum 77, 243
Idioblasts 215
Immunofluorescence 279
Ion permeability 19
Ion ratio 25
Ion transport 309
Japanese morning glory 169
Laevulinic acid 77
Leaf 37
Leaf movement 19
Lemna 259, 265, 271
Light regulation 139
Light trap method 207
Lipids 177
Malate dehydrogenase 89
Matthiola 159
Membrane 53, 203
Membrane permeability 293
Membrane potential 19, 225, 293
Membrane systems 85
Mesophyll 49
Microcinematography 207
Microprobe analysis 25
Microspectrophotometry 45
Morphogenesis 133
Morphometry 85
Myrosinase 215
Nicotiana 91, 97, 279
Nitella 225
Nitrate reductase 77, 231
Nitrate uptake 107
Nitrogen deficiency 259, 271
Nitrogen metabolism 71
Nitrogen starvation 265
Nuclear DNA content 5
Nucleic acids 45
Nucleus 139
Olea 1
Ovule culture 113
Oxygenation 159
Petunia 299
Pharbitis 169
Phaseolus 19, 61, 153, 203
Phloem transport 5, 145
Photoaffinity labeling 91
Photochemical activities 195
Photokinesis 207
Photomorphogenesis 203
Photoperiodism 133
Photophobic reaction 207
Photosynthetic 65
Photosynthesis 53
Phototaxis 207
Phytochrome 61, 203, 225
Picea 195
Pinus 5, 45
Pisum 37
Pollen 1, 45
Pollen grain 299
Potassium uptake 61
Protease 37
Protein-accumulating cells 215
Protein bodies 185
Protein degradation 259
Protein synthesis 13
Protohaem 77
Protonema 91
Protoplast 253
Pulvini 19
Pyridoxal phosphate 265
Raphanus 65
Regeneration 13
Reproduction, sexual 177
Rhythmicity (daily) 107
Ribonuclease 153
Ricinus 119
Riella 13
RNA 153
RNA synthesis 13, 139
Rosmarinic acid 287
Senescence 37, 53
SH-groups 303
Solanaceae 253
Somatic hybrid 253
Spherosomes 185
Spinacia 89
Stomatal aperture 243
Strasburger cells 5
Sucrose 145
Sucrose uptake 119
Sulfate 309
Sulfate incorporation 303
Sulfite 309
Sulfite incorporation 303
